EDUCATION	B.S in Mechanical System Design and Engineering	2014 - 2021
	Hongik University, South Korea	
	Integrated M.S./Ph.D. in AI Graduate School	2021 - 2025
	Gwangju Institute of Science and Technology, South Korea	
	Advisor : Prof. Jeany Son	
	Integrated M.S./Ph.D. in Graduate School of AI	2025 - Present
	Pohang University of Science and Technology, South Korea	
	Advisor : Prof. Jeany Son	
RESEARCH INTERESTS	Efficient 3D Reconstruction My research focuses on efficient 3D reconstruction with transformer-based foundation models such as VGGT. I investigate how viewpoint distribution affects multi-view geometric reasoning and develop training-free view organization strategies that improve camera pose estimation, depth prediction, and dense 3D reconstruction, while substantially reducing the memory and latency of large vision transformers and enabling feed-forward multi-view models to scale to thousands of frames without sacrificing geometric fidelity.	
SKILLS	Programming languages : C, Python Languages : Korean, English	
EXPERIENCE	Graduate Researcher	
	Student Researcher(In <i>GIST</i> , Advisor : Prof. Jeany Son)	2021 - 2025
	Student Researcher(In <i>POSTECH</i> , Advisor : Prof. Jeany Son)	2025 - Present
PUBLICATIONS	International Conference	
	Diversity-Aware View Partitioning for Scalable VGGT	
	Jinsoo Park, Donggyu Choi, Ahyun Seo, Minsu Cho, Jeany Son Accepted to <i>ECCV</i> , 2026	
		
	Anti-Prompt : Image Protection against Text-Guided Image-to-Video Generation	
	Yeonghwan Song, Chanhui Lee, Jinsoo Park , Jeany Son Accepted to <i>ECCV</i> , 2026
